

BREEZE

“It is attractive and very well designed. Event coordinators are going to love this new look.”

Providing chlorine treated water in your handwash station is an important step towards improved hygiene.

With an eye-catching design and sealed water tank to insure proper hygiene, the Breeze will thrill event coordinators who truly want both. It has two stations with full fingertip to elbow washing and operates with hands-free baby foot pumps that have been standard in Satellite products for many years, providing care-free operation.

When designing the Breeze, operators provided valuable input about the features that they like best in a handwash station. To maintain its attractiveness, the blue areas have a fleck pattern to hide scuffs and scratches. It also has extended bumpers on the side and top to buffer it when traveling. There are fresh and grey water drain plugs and an additional pump out port on the base for waste water. To aid drivers, all plugs are tethered to the unit to prevent loss or damage. It has two handles for lifting and fits easily inside most portables for ease of transporting. Most of all, it has a sealed fresh water tank where chlorine can be added to kill bacteria. All in all, it is a breeze to maintain and operate.
